Education

BS Software Engineer

University Of Agriculture, Faisalabad

Current CGPA: 3.22 / 4

Sep 2020 - Present

Courses

Web Development

Feb 2022

- 1) A Web Development Course in which I learn HTML, CSS and JavaScript.
- 2) I learnt them from basic to expert.
- 3) After completing this course I started React.

React

May 2022

- 1) I am learning and practice React for a year now. and also created many projects using this library on my own.
- 2) As React itself is a library, its often used in conjunction with other libraries and tools to create a complete development experience.
- 3) For example, when combined with state management libraries like Redux and routing libraries like React Router.
- 4) React can provide a more comprehensive solution for building larger and more complex applications.

Internships

React Developer Intern

DecaByte IT Solutions, Faisalabad

May 2023 - Present

Projects That I have worked and practiced on

Foodies

- 1) In this website I am using react redux and react router dom
- 2) I also add a functionality for login and sign up.
- 3) In this website I showed some dummy products.
- 4) We can add them to Cart and after that we can see the listed Items in cart, their total quantities and their total price.
- 5) After that For payment purposes I showed a modal in which we can also give the client discounts, the amount they payed and remaining amount.
- 6) Now after clicking Pay button a printable bill will appear with all listed items, and total price etc.

Movies and TV series Detail

- 1) This website is about movies and tv series.
- 2) I am using third party API in this website.
- 3) I added a functionality for separate movie details.
- 4) Finally I added a functionality for search any movie.

Text Utilities

- 1) In this website I am simply using some text transformation techniques.

Dashboard

- 1) This is a simple website in which I created a layout for a large scale website
